Title: Titanium-Attributes, Benefits, Use and Applications in the Marine Market

SNAME PS#: P16

Authors: John A. Mountford Jr, Milton R. Scaturro

Contact: jamountford@neo.rr.com

Abstract: Titanium creates value through its attributes - light weight, corrosion immunities, strength, environmentally non-toxic, performance & proven durability providing benefits of reduced fuel consumption, greater payloads/storage, reduced maintenance, labor & weight while eliminating needs for material replacement, coatings & paints. The paper outlines these attributes, benefits and specific Marine applications.

Keywords: Titanium; Pipe; Corrosion Maintenance; Weight; Marine; Volume
